Babies, toddlers and kindergarteners are falling through the cracks in all 50 states. We're facing a national crisis...

That's 5 million kids at risk. But last year only 1,077,081 received early intervention services.

Every year, 1 million kids enter school with an undiagnosed disability.

In the 60 secs it takes to read this, 8 babies will be born in the U.S.

Babies, toddlers and kindergarteners are falling through the cracks in all 50 states.

1 in 5 households with children have a child with a special healthcare need.

That is the equivalent of 13,333 full sized school buses full of children.

While a child can be diagnosed for autism as early as age 2, most children aren't diagnosed until age 4.

YOU CAN HELP CHANGE THIS: MakeTheFirstFiveCount.org
Empowers parents

- Suggested developmental activities for each age group & milestone
- Reminders for screenings & vaccines

Easy screening

- Parents screen at home
- Integrates into multiple EMRs
- Takes 1 minute to review

Adheres to American Academy of Pediatrics guidelines

- PEDS-DM for developmental delays at 9, 18, & 24/30 mos.
- M-CHAT-R for autism at 18 & 24 mos.
- PHQ-9 for postpartum depression at 1, 2, 4, & 6 mos.
